

*With sincere thanks to Barbara R. Katz, author of a unique scholarship-giving program which benefits children with cerebral palsy and mobility disorders.*

The BioMotion Foundation is home to an exclusive program that benefits children with cerebral palsy with its Pediatric Gait Analysis Program.

## *In the Name of A Child*

To support this severely under-funded and critically important medical intervention program for children with orthopaedic disorders, I have personally started a first of its kind scholarship/giving program called, **In The Name of A Child**. This unique program allows people like you and me to sponsor pediatric patients whom are under-insured and lack access to the ground-breaking scientific solutions, designed by the world class researchers, at The BioMotion Foundation.

My new gift program, **In The Name of A Child**, will provide health services to pediatric patients at no cost to them, or to their families.

To make a donation for a child in need of orthopaedic care, please call Lauren Garrett at **561.650.6104**
